50-70 lbs 80.00-85.00, 70-90 lbs  
75.00-80.00 (per cwt.)

## MISSOURI WEEKLY HAY SUMMARY

Rains fell over most all the state last night. Some farmers ended up with some wet hay, but none of them are that upset about it. The past couple weeks of hot dry weather had really dried out a lot of soil and many crops were in need of rain. With the great month of June there has been a very large amount of hay baled in the state so far this year. It seems we have had a very difficult time of making any hay on the higher end of the quality scale this year, but fair to good hay is abundant. At the current rate of most sales many farmers are flat going crazy as many have barns full and fields are getting smaller as high piles grow larger. Hay prices this week were steady to 5.00 lower as the amount of hay is putting a lot of pressure on the market, supply is moderate to heavy, and demand is light. Prices per ton unless specified). Supreme quality alfalfa 110.00-160.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00, Good quality brome hay 70.00-110.00. Good quality timothy hay 3.00-3.50 per small square. Good quality large round bales mixed grass hay 15.00-25.00, Good red clover hay 50.00-75.00. Fair quality large round bales Fescue 10.00-20.00 per bale. Wheat hay 50.00-60.00. Wheat straw 1.50-2.25 per small square.

## MIDWEST EGG REVIEW

Prices on large steady, medium steady, small .02 higher. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .47-.51, Medium .33-.35, Small .12-.18.

## Missouri Regional Fescue Seed Report

Fescue seed prices in all areas of the state are steady with last week. Harvest is basically complete in the state. Most buying stations have closed now, but a few are still taking seed. This year's estimated yield is expected to be somewhere around 65 to 70 million pounds of seed, which would be about 30 million lower than last years estimated harvest. Many factors have become apart of this years harvest from farmers just deciding to make hay, low prices, and the fact that large discounts were taken for orchard grass. So the lower harvest wasn't all because of a lack of seed, but more a lack of harvest. This will be the last fescue market this year. (Dry: Moisture 12-14%-Wet: Moisture greater than 14%) (Prices per lb.)Prices: .18 wet, .20 Dry

## WEEKLY COMMODITY GRAIN FUTURES TRENDS

Compared to last Friday: Soybeans .06 to .21 lower, Wheat .06 to .12 higher, except May .07 lower, Corn .04 to .07 lower, Soybean meal Jul 3.50 higher, others 1.12 to 5.50 lower, KC wheat .01 to .04 higher, except May .03 lower. (all price trends approximate ranges).

#### Weekly Crop Report

A generally favorable outlook for Missouri row crops continues over most of the State but rain will be needed soon to maintain growth and development. The dry, hot weather of the past week was excellent for harvesting wheat and hay, as 6 days were suitable for fieldwork, ranging from 4.6 days in the southeast district to 5.9 or more in all other districts. The topsoil moisture supply was reported as 6 percent very short, 34 percent short, 59 percent adequate and 1 percent surplus, as all areas except the southeast showed sizeable declines in moisture ratings. The northwest and west central districts are the driest areas, with ratings of over 60 percent being short or very short, a rapid decline over the past 2 weeks. The subsoil moisture supply, statewide, is rated as 8 percent very short, 35 percent short, 56 percent adequate and 1 percent surplus. Field Crops Report: Forty-three percent of the corn is silked, virtually the same as a year earlier and the 5-year average. Silking progress ranges from 10 percent complete in the northeast district to 95 percent in the southeast district. Reporters in many areas are hopeful that rain is received soon to ensure continued growth and thorough pollination. Corn condition is reported as 1 percent very poor, 6 percent poor, 25 percent fair, 52 percent good and 16 percent excellent, down slightly from a week earlier. Virtually all of the intended soybean acreage has been planted and 95 percent of the crop has emerged. Five percent of the beans have reached the blooming stage, several days behind both the 9 percent last year and 15 percent average. Condition of the crop is rated as 1 percent very poor, 6 percent poor, 31 percent fair, 52 percent good and 10 percent excellent, similar to a week ago. Ten percent of the sorghum is headed, 3 days ahead of last year and 1 day ahead of the 7 percent average. Condition of the crop is rated as 6 percent poor, 36 percent fair, 52 percent good and 6 percent excellent, virtually unchanged from last week. Ninety percent of the winter wheat is harvested, 3 days behind last year's early progress but 2 days ahead of average. Harvesting varies from 57 percent complete in the northeast district to 95 percent across the central third of the State and 99 percent in the southeast district. Seventy-two percent of the second crop of alfalfa hay has been cut, 4 days ahead of last year and a week ahead of the 57 percent average. Eighty-seven percent of other hay is cut, 5 days ahead of last year and over a week ahead of normal.
